

Crane Trash Skip

for Crane Hoists and Hauling

- ★ This rugged Heavy Duty Trash Skip with large lifting eyes has plenty of capacity to handle most any kind of trash or bulk material.
- ★ Constructed of heavy steel and reinforced at all stress points to ensure long useful life.
 - ☑ Heavy 3/16" steel plate construction
 - ☑ Strong 1/4" angle reinforces top edge and corners
 - ☑ Rugged channel reinforces sides and bottom

- ★ Designed to be hoisted with a set of 10 ft. or longer cable or strap slings. The sloped end makes it safe and easy to discharge the load.

IDEAL FOR REMOVING "TEAR-OFF" OR OTHER CONSTRUCTION REFUSE FROM ROOFS AND ELEVATED DECKS.

To dump the skip, the two forward slings are disconnected from the lifting eyes with the lifting line slack. The skip is then lifted with the rear slings still connected, effectively dumping the load from the sloped end.

Model No.	Description	Capacity	Weight
1446B	CRANE TRASH SKIP 2'D X 4'W X 6'L - with lifting eyes	1.5 cuyd. 5,000 lbs.	925 lbs.
