

Over-The-Bucket Forks

Extra Heavy-Duty

Add the convenience of a forklift to your loader

Take Forks ON & OFF without leaving the operator's seat.

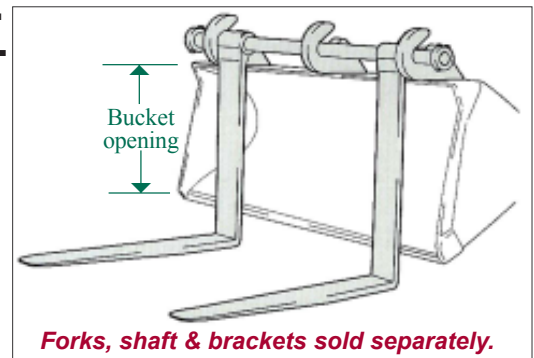

- Roll bucket forward
- Engage free-standing forks with brackets
- Roll bucket back to level forks

Don't buy a light-duty set of forks and bend them in the first month of use. Star Over-the-Bucket Forks are built stronger to last. Take a look at our specs and don't accept anything less.

FULLY FORGED FORKS JUST LIKE THE ONES ON YOUR FORKLIFT (these are not forks built from two pieces of steel welded together that require a gusset to keep them from coming apart).

BIG 2" DIAMETER SOLID STEEL SHAFT 80" long. Same size shaft as used on 6,000 and 8,000 lb forklifts.

HEAVY DUTY 3/4" PLATE STEEL BRACKETS Brackets are built from thicker plate so only 3 are required (more than 3 restricts side to side adjustment of forks).

Forks, shaft & brackets sold separately.

Shaft, brackets & forks SOLD SEPARATELY.

We guarantee you will be pleased with these forks.

MODEL (Shaft only)	Description	Weight
LBA170-02	2" dia. by 80" long sold steel shaft with retainers	70 lbs.
