With HYDRAULIC
DUMP**

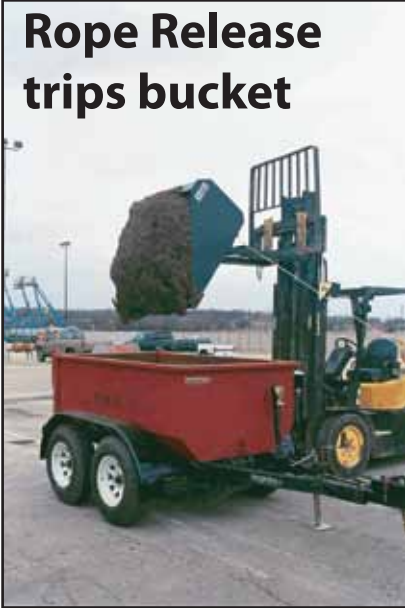

Model 1445SD shown

Slips on the forks - Installs in minutes

No modification to forklift required

Load sand, gravel, mulch or most any loose material.

Rope Release trips bucket

**Easy
Simple
&
Effective**

Manual Dump or Hydraulic Dump

PRODUCT OPTIONS

Manual Dump Operation is simple. After disengaging the safety lock, the bucket can be tripped with the handle at the back of the bucket or from the operator's seat with the remote rope release. Lowering the bucket to the ground resets the bucket for the next load.

Safety Lock prevents accidental tripping of bucket during transportation.

Heavy duty construction and a dependable trip mechanism ensures long trouble-free life. An affordable low cost makes this bucket easy to justify even for the occasional user.

MANUAL DUMP BUCKETS

Model	Width	Capacity	Weight
1440SD	45" ID	¼ cuyd.	420 lbs.
1445SD	45" ID	½ cuyd.	445 lbs.
1472SD	72" ID	¾ cuyd.	710 lbs.
1484SD	84" ID	1 cuyd.	820 lbs.

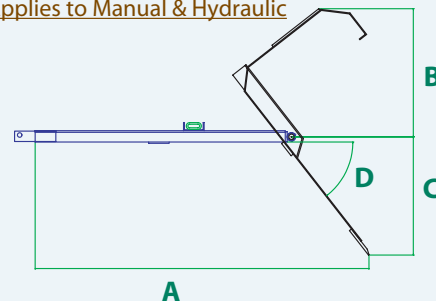

Optional Hydraulic Dump is convenient and provides precise control of the discharge. Hydraulic flow from the forklift is required and hydraulic control valve is not included. Frequently if the forklift is equipped with a hydraulic side shift, flow from that valve can be diverted to the bucket cylinder.

HYDRAULIC DUMP BUCKETS

Model	Width	Capacity	Weight
1445SDH	45" ID	½ cuyd.	475 lbs.
1472SDH	72" ID	¾ cuyd.	740 lbs.
1484SDH	84" ID	1 cuyd.	850 lbs.

Illustration shows bucket in dump position. Applies to Manual & Hydraulic

Model	A	B	C	D
¼ cuyd	57"	18"	19"	60"
½ cuyd	65"	25"	23"	52"
¾ cuyd				
1 cuyd				

The **Self-Dump Bucket** is perfect for anyone that wants to load loose material and owns a forklift but doesn't own a loader. Installation is quick and easy. The bucket simply slips on the forks – no hydraulics - no modifications to the forklift.

DANGER - DO NOT USE WITHOUT INSTALLING RETAINING PINS BEHIND THE HEEL OF EACH FORK AND SECURING WITH HAIR PINS OR COTTER PINS. SAFETY CHAIN(S) MUST ALSO BE USED. WRAP CHAIN AROUND A STRONG PART OF THE FORK CARRIAGE AND SECURE WITH LOCKING GRAB HOOK.

The ¼, ½ or ¾ cuyd. capacity is an ideal size for the masonry supply, landscape supply or anyone that wants to load small quantities of sand, top soil, mulch, landscape materials, etc. It is also great for clean-up work around an equipment or supply yard.

Fork Pocket Size: 48" long x 6¾" x 3" ID / Center to Center of Fork Pockets: 22" / Pocket Ends are closed.
